# Spear-it®

## Stand-up Tools...

See the video!

Patented

Merchandiser Available

- Construction
- Gardening
- Lawn

Construction:

- Rubberized Grip
- Hammer Tone Finish
- Carbon Steel Attachment
- Powder Coated Ergonomic Steel Shaft

**Convenience:** Tools with the Spear-it will no longer have to be placed or dropped to the ground, eliminating the need for bending down to pick them up. This will benefit the elderly and people with health or back problems.

**Safety:** Lawn and Garden tools which have pointed and sharp edges are less hazardous for stepping on or tripping over when they are left standing upright.

**Cost Effective:** Risk of driving over standing tools with maintenance equipment (pickups, mowers, etc.) is reduced when tools are standing upright. Tools that are standing are less likely to be lost.

**Time Saving:** Tools that are left standing upright are easy to see from a distance, which reduces the need for walking around to look for them.
